

Amadeus Construction (Scott Botruff) have worked nothing less than a miracle building us a new handicapped accessible kitchen. I am in a wheelchair full time and my husband/partner is able to work in a regular kitchen. The kitchen was totally gutted and, now finished, does not in any way shout "handicapped". It is BEAUTIFUL and totally functional for both of us.

In the planning, Scott worked with Dawn at Standard Kitchens; and worked co-operatively with JoAnn from Disability Advocates--measuring up and down, in and out, and throwing ideas back and forth faster than I could begin to comprehend. Then they took our hopes and my dreams and worked everything all together--an outstanding kitchen workable for both of us.

Scott sent in his craftsman, John, who did the very labor intensive job from start to finish. He was unbelievable--a master of all trades, for example: hanging cupboards, measuring cutting and making everything fit, putting on laminate counter top and cleverly putting on trim that I wanted, cleverly rerunning plumbing and electricity, putting up specialty trim and calking it, etc. He started with a totally gutted kitchen hole and said "I can see the results in my head." and he surly could. John was a perfectionist and any question he had he called Scott for affirmation. John always cleaned up after himself and kept the working area neat and always left it neat when he quit at the end of the day. AND, John was such a nice person to have in your home. He is a great representative for Amadeus.

When John and Scott were finished we had a BEYOND BELIEF ASSESSIBLE AND BEAUTIFUL, PERFECT IN EVERYWAY, KITCHEN.

We highly recommend Amadeus Construction and Scott Botruff for any handicapped accessible work to be done in the home. Five stars

George and Karen Clark
